# About Company

Mandy Web Design is a place where creativity joins hands with the supremacy of high-end technology that reflects on the progress of our clients. We are web development company serving a variety of clients with its industry-leading web solutions.

# OUR VISION

To set your best impression in front of your present and potential audience.

...

# OUR MISSION

To lay the foundation of your brand  
in this online competitive world.

# OUR VALUE

To come up with top-notch and functional designs for your website.

# Our Goals

To ensure the best possible strategic outcome for your website design.

To provide the best website design and development, but also help you with the most engaging services to attract your target users.

We are focused on one thing – your long-term success

# Highly Effective Web Design Process

## 01 Planning And Strategy

Once we have all the information, our experts get started with developing a sitemap that offers a clear idea of the website's architecture.

## 02 Testing

Once the website has all the visuals and content, we get started for the testing phase.

## 03 UI/UX Design And Development

We create multiple design concepts and directions. We work on wireframe, layout, colour scheme, translate the design into the live site and more.

## 04 Launch

After the testing, we upload the files to the server. An FTP (File Transfer Protocol) software is used for that purpose. Run a final diagnostic check to ensure the website runs smoothly.

# Our Services

UI Design

Website Design

Website Development
