

## Key Features Of An Exterior Wall Mounted Handrail

An [exterior wall mounted handrail](#) is a safety feature installed on the exterior walls of buildings to provide support and stability for people using stairs, ramps, or other elevated surfaces. These handrails are typically made of metal or other durable materials that can withstand exposure to the elements.

Here are some key features of an exterior wall mounted handrail:

**Material:** Handrails can be made of a variety of materials, including stainless steel, Hard Wood and wrought iron. The choice of material depends on the desired aesthetic, as well as the climate and conditions of the location.

**Design:** Handrails can be designed in a range of styles, from sleek and modern to ornate and decorative. The design should be functional, providing a secure grip for users, while also complementing the architecture of the building.

**Installation:** Exterior wall mounted handrails must be securely installed to withstand the weight and force of users. Professional installation is recommended to ensure that the handrail is installed correctly and meets local building codes and safety standards.

Maintenance: Like any outdoor fixture, exterior wall mounted handrails require regular maintenance to ensure their longevity and functionality. This may include periodic cleaning and inspection for damage or wear.

Overall, an exterior wall mounted handrail is an important safety feature for any building with elevated surfaces. Proper installation, design, and maintenance can ensure that the handrail provides a secure and reliable support for users.

Get in touch with Stair Warehouse if you are looking for Exterior Wall Mounted Handrail made from Mahogany, Stainless Steel or Aluminum. They can also custom-make handrail in wood species like Teak and Cumaru.

Remember that wood handrails require regular maintenance to protect them from weathering and wear. Be sure to follow the manufacturer's recommended maintenance schedule and use the appropriate products for cleaning and sealing the wood.
